

# Linkit Kim/SMD

## linkit-v4

Low-power wildlife telemetry platform designed for long-term field deployment.

This variant integrates the SMD Argos module, optimized power management (wireless charging, solar input, and USB/Li-ion handling), and a compact architecture prioritizing energy efficiency, cost, and reliability. All interfaces and components are arranged to ensure seamless compatibility with the Linkit firmware ecosystem and Arribada's open-source tooling.

initiative

Pull down (in case of deep sleep power mode)

Added pull down in case we use SYSTEMOFF sleep mode, not used on linkit -> remove if power optimization is required

Flash Memory

Probe connector

Status LED and aperture

Option, not required but can help for certain application  
Cell backup coin only charged if GNSS enabled.
